SUMMARY

Deep domain expertise in the **Financial Services** sector, with a focus on **NYSE standards**, regulatory compliance, and complex trading workflows. Extensive experience managing systems for **Banking, Insurance, Mortgage, and Oracle Insurance Policy Administration (OIPA)**, alongside diverse experience in **Gaming, Retail, and HR**

ISTQB certified **Quality Assurance Engineer with over 10 years** of hands-on experience specializing in Salesforce testing across **Non-Profit Cloud, Sales Cloud, and Service Cloud**, along with 2 years of automation experience using **Playwright**. Salesforce Certified Administrator proficient in configuration, customization, user management, and data security best practices. Excel in creative exploratory manual testing, designing and executing comprehensive test cases for functional, regression, integration, and end-to-end testing of Salesforce applications using tools such as **Jira, Microsoft Test Manager, and Oracle Test Manager (OTM)**. Strong expertise in **API** testing with **Postman** for Salesforce integrations, database validation using Workbench and complex **SQL** queries, and defect management within Agile environments to enhance test coverage and quality processes. Proven track record of delivering high-quality Salesforce solutions across diverse industries

KEY SKILLS

- Manual & Automation Software Testing
- Functional, Regression & Integration Testing
- UI Testing
- SDLC & STLC
- Test Case Design & Execution (**Jira, Microsoft Test Manager, and Oracle Test Manager (OTM)**, xray, Testrail)
- Bug Tracking (**JIRA, Azure DevOps, Rally**)
- Defect management
- Analytical & Problem-Solving Skills
- **Salesforce (sales cloud, service cloud, non-profit cloud)**
- **Workbench (SOQL)**
- Collaboration & Communication
- Documentation & Reporting
- UAT testing
- Self-motivated and independent worker
- JIRA Management

TECHNICAL SKILLS

- **Methodologies:** SDLC, Agile, Waterfall
- **Technologies:** SFDC
- **Documentation:** Test Cases, Test Plans, Defect Reports
- **Programming:** Java, JavaScript,
- **Automation:** Selenium, Provar, Playwright
- **API Testing:** Postman, SoapUI
- **Database:** SQL Server, PL/SQL, Oracle SQL Developer, MongoDB
- **Integration Tools:** Eloqua, Boomi, MuleSoft, ServiceNow, ORMB, CRM admin

WORK EXPERIENCE

ICE Data Services (NYSE) – QA Analyst

May 2023 to January 2026 (Onsite)

- Automated end-to-end test data creation flows for **Cases, Accounts, Contacts**, and various custom Salesforce objects using the **Playwright**.
- Analysed functional requirements, **JIRA** acceptance criteria, and business documents to develop comprehensive **functional, end-to-end, regression, integration**, and **UAT** test scenarios for **Sales Cloud** objects including **Opportunity** (Parent/Renewal/Mid-term/Multiyear), **Approvals, Case, Product, Quote/Quote Line, Pricing, Lead, Subscription, Account, Contact, Order, Contract, Billing Account, Project**, and custom features like **Work Status Dashboard, Survey, and Reports/Dashboards**.

- Tested **Service Cloud** functionalities encompassing **Case Management, Email-to-Case, Web-to-Case, Community Case, Case Assignment, Knowledge Articles, Omni-Channel, Chatbot, Live Chat, Chatter, Solutions, and Incident Management**.
- Executed **manual testing, regression testing, and mobile application testing** on **Salesforce** Android/iOS apps; validated automation scripts and performed re-testing of resolved defects.
- Managed full defect lifecycle in **JIRA**: logged bugs, conducted **root cause analysis** on client issues, re-tested fixes, closed/re-opened defects, and tracked open/fixed/new issues across Development, BA, Manual, and Automation teams.
- **Lightning Experience** is Salesforce's modern user interface, designed to improve productivity, provide better insights, and streamline workflows compared to Salesforce Classic.
- Performed **data migration testing, data sync/integration testing, and database validation** using tools like **Salesforce Inspector**; ensured data integrity across environments.
- Conducted **API/integration testing** for **Salesforce** integrations and data flows; supported extended troubleshooting, issue resolution, and workflow turnaround for internal/external teams.
- Experience testing **Apex classes, SOQL queries, and integration testing**
- Hands-on experience with Veruna managed package
- Delivered application **demos**, participated in **scrum calls, defect triage, project requirement discussions, and client interactions**; maintained strong collaboration via email, Teams chats, and cross-functional support.
- Generated **test summary reports**, executed tests on new builds, analyzed changes, and updated test cases to maintain high **test coverage** and quality in **Agile** environments.

Oracle – Quality Analyst

March 2022 to May 2023 (Hybrid)

- Collaborated with business analysts and development teams to review **Business Requirements Documents (BRD)** and understand OIPA architecture, functionality, rules-based configuration, and integration points for policy administration workflows.
- Prepared detailed **Test Plans, Test Cases, Test Summary Reports**, and functional documentation based on received requirements to cover end-to-end policy processes (new business, underwriting, issuance, servicing, claims).
- Uses XML-based rules, allowing business users to configure products, screens, and workflows rather than relying on hard coding.
- A standalone application (**Rules Palette**) used to configure the OIPA system, which supports the creation of screen, validation, and calculation rules.
- Ensured all development deliverables met quality standards through structured **test planning, test execution, quality assurance, issue tracking**, and verification of compliance and data integrity.
- Developed and enhanced **API test scripts** using **Postman** to validate changes in OIPA objects, APIs, integrations, and testing environments; supported robust regression and smoke testing for API-driven policy updates.
- Conducted **end-to-end testing** of core OIPA features, including policy creation/modification, transaction processing, billing cycles, claims handling, and system responses across individual and group insurance lines.
- Performed **functional, regression, integration**, and exploratory testing; logged, tracked, and re-tested defects to maintain high **test coverage** and application stability.
- Contributed to defect triage, root cause analysis, and resolution support, ensuring timely delivery of high-quality policy administration capabilities in a complex insurance ecosystem.

IbaseIT - Software Test Engineer

January 2015 to March 2022 (Onsite)

- Delivered QA services across multiple client projects in **insurance, gaming, HR, trading, CRM, and retail domains**.
- Designed and executed functional, regression, and integration test cases for **web and enterprise applications**.
- Conducted extensive **API testing** and shared reusable Postman collections with team members.
- Validated backend data using **SQL queries**, ensuring accuracy between UI and database layers.

- Supported **pre- and post-production deployments**, including smoke testing and release sign-off.
- Actively participated in Agile ceremonies including **daily stand-ups, sprint reviews, and retrospectives**.
- Performed security testing including authentication, authorization, and session validation.

CERTIFICATIONS

- **Salesforce Certified Administrator (ADM-201)**
- **ISTQB** Certified tester

EDUCATION

Bachelor of Technology from Jawaharlal Nehru Technological University
